SOGGY BOTTOMLANDS

*Harvest Brodiaea (*Brodiaea coronaria ssp. coronaria*) and the similar species listed in that paragraph grow best in slightly moist to dry sunny areas.

*Larkspur (*Delphinium spp.*). Menzies larkspur (*Delphinium menziesii*) needs dry to slightly damp sites, sun to part shade. Tall larkspur (*D. trolliifolium*) needs part shade and moderate- to well-drained soils.

*Showy milkweed (*Asclepias speciosa*) does best in well drained soils in full sun. It can tolerate some heavier soils and a bit of shade.
