## Key to Lane County Rare and Endangered Lists

**List A:** Species with Federal (U.S. Fish and Wildlife Service), State (Oregon Department of Agriculture) and/or are on the Oregon Biodiversity Information Center (ORBIC) List 1 or List 2. These species have some protection on state and federal lands:

1. Federally (USFWS) listed as Endangered, Threatened, Candidate, or Species of Concern
2. State (ODA) listed as Endangered, Threatened, or Candidate
3. On ORBIC List 1 (endangered or threatened throughout range) or List 2 (endangered or threatened in Oregon but stable elsewhere)

**List B:** Taxa, not on List A, that have few known populations in Lane County (generally 10 or fewer) and have some threat to their survival (to habitat, genetic diversity, over harvesting, etc.). These species have no statewide protective status under state or federal programs.

**List C:** These are species Emerald Chapter, NPSO, wants to track. It includes:

1. Species on ORBIC List 3 (Review List) unless already on List B because of special concern in Lane County.
2. Species limited in number and not widespread in Lane County. Abundance has been documented. Populations are currently stable but should be watched.
3. Species known from one to several sites in Lane County, but actual abundance is uncertain. More research is needed to determine status.

**Historic:** These are rare species that have been documented in Lane County in the past but have not been relocated in the past 40 years.

**Watch:** These are rare species that have been located near Lane County, but no known populations currently exist within county boundaries.

### **Federal (US Fish and Wildlife Service) status:**

LE = listed endangered

LT = listed threatened

SOC = species of concern

### **State (Oregon Department of Agriculture) status:**

LE = listed endangered

LT = listed threatened

C = candidate for listing

### **ORBIC (Oregon Biodiversity Information Center) list:**

1 = endangered or threatened throughout range

2 = endangered or threatened in Oregon, but stable elsewhere

3 = more information is needed before status can be determined

4 = of conservation concern, but not currently threatened or endangered

### **Ecoregions:**

CZ = Coastal Zone

CR = Coast Range

WV = Willamette Valley

WC = Western Cascades

HC = High Cascades
